f. Student : Faculty Ratio

The chart below shows the student-to-faculty ratio from 2014 to 2020. The x-axis represents the years, and the y-axis represents the number of students (majors) and the faculty ratio. The data points indicate a decrease in the student-to-faculty ratio over the years, with values ranging from 20 to 33. The chart also shows a trend line for both the number of majors and the faculty, indicating a slight increase in both categories.
3. CO-OPS and INTERNSHIPS

The Engineering Cooperative Education & Internship Program (ECIP) helps undergraduate students to obtain career-related employment of two types: cooperative education (co-op) positions and internships. A co-op experience provides an opportunity to apply what is learned in the classroom in career-related positions by alternating semesters of full-time coursework with periods of paid, full-time employment. Internship involves one work period with an employer. A work period may last for one semester or for two consecutive semesters. Summer internships are the most popular among students and employers.

Students meet with Brian Endres and Kristen Forche to evaluate different schedule arrangements before interviewing because many employers hire for specific "rotations". For instance, students may work full-time during the summer term, attend full-time classes in autumn, and return to their employer for full-time work in the spring. The most popular term to work is the summer. Last year, CBE students completed 127 co-op rotations, internships or part-time work experiences (as reported by students to Engineering Career Services).

The following is a list of companies who hired Ohio State undergraduates in our program and the students who were hired by those companies:

4. 2020-21 SCHOLARSHIPS

A total of 97 students were awarded undergraduate scholarships in the Chemical & Biomolecular program. All students earning a scholarship are current OSU students. A total of $309,919 was awarded to students heading into the 2020-2021 school year. The average award was $3195 this year compared to $2962 the previous year.

Trends in data from financial aid show that the number and amount of both student and parent loans have been increasing. Both Ohio State tuition and University financial support have increased yearly. However, since the increase in scholarship support hasn’t been able to keep up with tuition increases, engineering students and their families have had to increase their debt levels to cover the additional costs. In the William G. Lowrie Department of Chemical and Biomolecular Engineering, department scholarships from alumni and corporate donors help defray a small part of the loans burden for many of our students.

Department scholarships are determined mainly by need, however, when a scholarship specifies that a student’s merit be considered, both merit and need are taken into account. We thank those of our alumni who have established scholarship endowments for this purpose as well as our corporate donors who provide scholarships on an annual basis.

5. GRADUATES AND JOB PLACEMENTS

CBE had 183 graduates in 2020.

Honors

A number of our graduates received Latin Honors, With Research Distinction Honors or With Honors in Engineering. Latin honors are defined as follows: a cumulative grade point average (GPA) of 3.5-3.69 is Cum Laude; 3.70-3.89 is Magna Cum Laude; and 3.90-4.00 is Summa Cum Laude. A student who graduates “With Honors Research Distinction” is an honors student (greater than a 3.4 GPA) who has completed a senior Honors research thesis. A student who graduates “With Research Distinction” is a student (GPA between 3.0-3.39) who has completed a senior research thesis. A student who graduates “With Honors in Engineering” has completed a three-pronged program consisting of completing a required number of honors courses, participation in community service, leadership and outreach as well participation in “investigational studies” which typically includes completing a research paper or thesis or completing a minor. Nineteen graduated with Honors in Engineering and five students graduated with Distinction in various disciplines.

Placements

Graduates of our program continue to have a strong placement record both within industry and within graduate and professional programs. The information provided below is self-reported by seniors who completed exit surveys at the time of graduation. Many additional placements are reported in the months following graduation, but are not included in the figures below.

As of June 2020, eighty-six percent of our graduates went directly to industry with their B.S. degrees, working at corporations and companies such as Exxon Mobil, the Dow Chemical Company, pH Matter LLC, and General Mills. About seven percent of our students pursued graduate or professional
school. Approximately 24% of our students accepted positions in Ohio and will stay in the state to pursue their post-graduation plans.

Engineering Career Services (ECS) welcomes all employers to register, to recruit Ohio State engineering students and graduates. There is no cost to register and no fees for ECS services. If you, or someone you know, is interested in hiring Ohio State students for co-op experiences, internships or for full time placement, please contact Amy Thaci, Director of Engineering Career Services at (614) 292-6651. You can read more about the services offered through ECS by visiting their webpage: http://ecs.osu.edu.
