Front Row: R.D. Smith; D.T. Horn; R.M. Linek; B. Frazier; A. Syverson; D.K. Garber; L.R. Latta; R.S. Brodkey; D.J. Serbin

Second Row: P.C. Hursh; E.R. Haering; R.E. Lynn; R.R. Konanz; S.P. Lankton; D.R. Weber; C.L. Payne; E.E. Imbrogno; M.W. Ryder; D.F. Arnold

Third Row: S.L. Grant; M.S. Matosky; C.J. Geankoplis; K.E. Hansen; J.J. Keenan; M.R. Vercellotti; M.E. Carson

Fourth Row: D.M. Muller; K. Davis; W.B. Kay; T.L. Sweeney; D.J. Hinerman; L.J. Proctor; F.W. Mitchell

Back Row: T.B. Hackett; H.C. Hershey; R.A. Schilling; R.T. Collins; R.A. Bouton; J.M. Delabar; D.H. Millisor; G.R. Bellopatrick; L.M. Vlcek; J.H. Wood; W.M. Fugel; M. Maciejewski
Twenty-ninth Annual Report
to
The Chemical Engineering Alumni

March 16, 1977

Dear Alumni:

I am very pleased to have the opportunity to write to you regarding the activities of the department during the past year. While I have had the privilege of meeting many of you over the years, this is the first time that I have had the occasion to report to you as a group.

This year ACE Day will be held on Friday, May 20, 1977, and I hope that as many of you as possible will be back at that time. We especially would like to greet members of the anniversary classes of 1907, 1912, 1917, 1927, 1932, 1937, 1942, 1947, 1952, 1957, 1962, 1967, and 1972. Since the Alumni Association Weekend is scheduled for the 21st and 22nd, we are hopeful that many of you will be able to return to visit with us. A registration form for the ACE Day luncheon is enclosed in this report.

I am sure that all of you will share our delight in learning that the Board of Trustees recently renamed the building in honor of Joe. The new name is the Joseph H. Koffolt Laboratories. This honor is most deserved and recognizes, in a small way, the many contributions that Joe made to the University, the profession and to each of us who had the opportunity to have him as a teacher and friend. During the afternoon departmental session, we will have a short ceremony to commemorate this renaming. We are having a portrait of Joe painted and it may be seen at that time. Joe's health remains about the same as it has been for the last couple of years. Unfortunately, this probably will not permit him to be with us for ACE Day, although Mrs. Koffolt and his son, Tom, are planning to attend.

Last Spring Sy decided that he would like to be relieved of the chairmanship and return to full-time teaching and research. All of us were extremely sorry to lose his outstanding leadership. As he explains in his letter, there were two reasons for his request – one being health related which necessitated his reducing his work load back to a more normal 40 to 50 hours per week and the other being a strong desire to develop his catalytic research work to its full potential. I am sure that each of you joins with all of us in the department in expressing our gratitude and appreciation to Sy for his many efforts on behalf of the department and the profession during his term as Chairman. I have had the privilege of serving as the Acting Chairman during the past year and have enjoyed having the opportunity to serve the department in that assignment. The Dean has appointed a search committee that will soon make recommendations concerning a permanent chairman.

As Sy mentioned to you last year, Dean Bolz retired the first of July after having provided leadership to the College for nearly 20 years. Our new dean is
Dr. Donald D. Glower who was the former Chairman of Mechanical Engineering. Don is most enthusiastic and is bringing many worthwhile ideas and programs to the College. I am sure that the College and the department will make much progress under his guidance and leadership. Kelly Latham, who I know you all remember so well, retired last Spring after nearly 30 years of service to the department. Kelly and his wife have been doing a lot of traveling and seem to be enjoying their retirement activities. Phil Logsdon has recently joined our staff as a Laboratory Machinist and has provided support to our various programs.

We are engaged in an active search for new faculty at the assistant professor level. With increased undergraduate enrollments and the need to develop expanded projects in the areas of Processing and Energy, this is a most critical need for the department.

Our undergraduate enrollments are soaring. We have 36 seniors, 65 juniors, and 97 sophomores this year. Needless to say, this is resulting in increased pressures on both the faculty and staff as well as providing us with some laboratory and space problems. These increased Chemical Engineering enrollments are occurring nationwide and are of some concern to many of us. The primary question is whether the profession will be able to absorb the increased number of students as they graduate. Graduate enrollments have decreased recently due in part to the smaller graduating classes and the smaller percentage of students going on to graduate studies. Hopefully, this trend will be reversed as the larger classes start to graduate. Employment opportunities this year remain excellent. Last year's average salary was $1300 per month and will be between $1400 and $1500 this year.

Our academic programs continue to progress well. We underwent ECPD accreditation inspection last year and the report was very good. The department is fully accredited as it has been since 1925. The faculty continues to serve with dedication. Despite increased teaching responsibilities, they have maintained much progress in their research and service efforts. Unfortunately space doesn't permit a full listing of all these activities. Professor Slider's textbook "Practical Reservoir Engineering Methods" was published last June and Professor Geankoplis has finished his second textbook "Transport Processes and Unit Operations" which should be available soon.

The faculty joins me in sending our best wishes to each of you. We are most grateful for your continued loyalty, interest and support of the department. We hope that many of you will be able to join us for this year's ACE Day events. Please keep us posted on your activities.

Sincerely,

E.R. Haering
Greetings:

This past year has been an eventful one for the Department and for me personally. Ed Haering has given a detailed account of departmental activities but I would like to mention a few highlights as well as a few comments of a personal nature.

Accreditation of engineering departments is conducted periodically and it was our turn for "inspection" last March. The accrediting committee's report on our Department was very good and it continues to be fully accredited.

Until recently, University policy required that buildings could be named in honor of deceased persons only. About a year ago the Board of Trustees changed this policy and our Chemical Engineering Building has now been named the "Joseph H. Koffolt Laboratories." This is indeed a deserved and fitting tribute to Joe's many contributions and we are especially grateful that such recognition could come about at a time when he can appreciate and enjoy it. Joe continues to live in a nursing home in Stamford, Connecticut, near his son, Tom, and his health remains about the same as last year.

The past eight years as Chairman and one year as Associate Chairman have for me been very busy but also very rewarding. The many associations with our administration, faculty, students, alumni and members of industry have been stimulating and have developed into many treasured friendships. Time brings about changes for us all. As those of you who were here for ACE Day last May know, I was in the hospital for tests at that time. My health problem seems to have stabilized but it became clear that I would have to reduce my level of activities. For the past decade I have been involved in some interesting research which I would like to complete before retirement and this seemed to be most difficult to do while serving as chairman. In view of these factors, I requested to be relieved of the chairmanship July 1, 1976, with, of course, many mixed feelings. A comforting fact, however, was that Ed Haering who served so well as Vice Chairman for two years agreed to serve as Acting Chairman and was appointed to this position last July 1. Ed, with his broad background and experience in the Department and with his administrative abilities and devotion to the Department and to our profession, is doing an outstanding job.

One of the important rewards for us in the academic world is to learn about the contributions and success of our alumni. As I review my associations with you, I have many reasons to be grateful for your loyal support over the years and as I contemplate retirement from the University these relationships seem to become even more meaningful. Thanks for your help.

Best wishes.

Sincerely,

Aldrich Syverson

P.S. ACE Day is May 20th. We and your classmates would like to see you again.
ACE DAY PROGRAM  FRIDAY, MAY 20

11:00  RECEPTION  Ohio Union Ballroom
12:00  AWARDS LUNCHEON

RECOGNITION of outstanding alumni, students, and faculty

2:00  DEPARTMENTAL PROGRAMS

CHEMICAL ENGINEERING DEPARTMENTAL PROGRAM

Room 207
The Joseph H. Koffolt Laboratories
Friday, May 20, 1977

2:00  WELCOME TO ALUMNI AND GUESTS

Introduction of Anniversary Classes

STUDENT AWARDS

2:30  HONORING JOE KOFFOLT

3:00  OPEN HOUSE AND SOCIAL HOUR

---

1977 Annual Conference for Engineers and Architects
Reservation

Yes, I will attend the Annual Conference for Engineers and Architects on May 20, 1977.
The conference fee is $8.00 per person which includes registration, reunions and luncheon.

Enclosed check for $________________.

Please make check payable to ACE Day and mail to:

COLLEGE OF ENGINEERING
MERITORIOUS SERVICE CITATION

May 14, 1976

EDWARD E. SLOWTER

Edward E. Slowter is Vice President of Battelle Memorial Institute and Secretary-Treasurer of the Institute’s Board of Trustees. He received three degrees from Ohio State University: Bachelor of Chemical Engineering, 1934; Master of Science, 1935; and the professional degree, Chemical Engineer in 1939. Nearly all of his professional life has been with Battelle, as Research Fellow, Research Engineer, Administrative Assistant and, in 1957, as Vice President. An officer during World War II, he won an Army Commendation Ribbon for his work on anti-aircraft fire control procedures. He has written numerous technical papers and articles and holds patents on the production of metallic bodies, siliconizing processes, and for a tantalum coated gun barrel. He played a key role in initiating the Korean Institute of Technology which, like his firm, is a not-for-profit research organization. A Columbus native, Mr. Slowter’s civic activities are prodigious. He has chaired the Development Committee for Greater Columbus, is a member of the Chamber of Commerce, Cosmos Club, Rotary, former president of Torch Club, and a frequent officeholder in his Unitarian church. He is a director of the Ohio State University Research Foundation, member of the Presidents Club, and a prime mover in the Committee of 100 for Engineering at Ohio State. His leadership in the Committee significantly contributed to interest in and support for the College by alumni, greatly aided the successful student guidance program and enhanced College-industry ties. A Fellow of the American Institute of Chemical Engineers and a member of the American Society for Metals and the American Management Association, he was named a Distinguished Alumnus of the College of Engineering in 1960. In 1961 he became the Columbus Technical Council’s Man of the Year, and in 1970 received the Ohio State Centennial Achievement Award. Capping 20 years of membership in the Ohio and National Societies of Professional Engineers, Mr. Slowter is now President of NSPE.
NEWS RELEASE: From On Campus publication – Renaming the Chemical Engineering Building to the "Joseph H. Koffolt Laboratories"

The Chemical Engineering Building has been renamed for Joseph H. Koffolt, 74, department chairman for 20 years before his retirement in 1971.

An active faculty member for 40 years, Koffolt, who presently lives in Stamford, Connecticut, in 1960 received a standing ovation from about 450 of his alumni at the building's dedication.

The son of an Austrian immigrant who settled in Cleveland, Koffolt earned three degrees from the University – the Bachelor of Chemical Engineering in 1924, M.S. in 1929 and Ph.D. in 1931.

Koffolt, a nationally known authority in chemical engineering, served as an industrial consultant with federal and state governments and had extensive experience in the areas of explosives and thermodynamics.

A Fellow of the American Institute of Chemical Engineers, he received that organization's Founder's Award and the Technical Man of the Year Award from the Columbus Technical Council.

He began his teaching career with the vow that "I was going to know everybody I taught and not forget them." He often refers to his graduates, scattered in most of the states and 40 countries, as his "Jewels" and he kept in close touch with them throughout his teaching career.

Throughout his career, Koffolt was rarely seen without a black cigar, considered his trademark by all who knew him.
1976 ACE DAY ACTIVITIES

CHEMICAL ENGINEERING DEPARTMENT

Ed presiding during Sy's Riverside stay.

John Heibel - "Interactive Graphics"

Luanne Proctor, R. E. Lynn
AICChE Scholarship Award
Dick Bouton, R.S. Brodkey
American Institute of Chemists Award

Dave Thaman, Dave Wells,
Dale Gyure, Luanne Proctor,
Bill Corder - Junior's Award from COS-AIChE.

Dale Gyure, R.E. Lynn
AIChE Scholar Award
Golden Anniversary Class 1926 - Mr. & Mrs. Chester Landes, Mr. & Mrs. Vincent Lauderman.

1941 - John D. Ireland

1936 - Paul Mills, Ellis Neunherz, Phil Sharr (missing from photo R.A. Ewing).

Class of 1951 - Harry Gossard, Jim Peters, Richard Kreager, Denver Harris, Jim Slattery, Chuck Dornbusch (not shown D.A. Strang).
1956 - Paul Linder, Ed Haering

1966 - Karl Svanks, Ed Haering

1971 -
Don Kiefer,
John Hoover,
Jeff Kosch,
Paul Swartz,
Jim Nycz,
Phil Meves,
Julie Balmer (nee Davison),
Kerry Hertenstein. (Eric Grulke not shown.)
